## **DETAILED ACTION**

### ***Response to Amendment***

In response to the amendment filed 2/17/2004, claims 30-39 are added. Claims 1-39 are pending.

### ***Terminal Disclaimer***

The terminal disclaimer filed on 2/17/2004 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US Pat. No. 6,490,039 has been reviewed and is accepted. The terminal disclaimer has been recorded.

### ***Allowable Subject Matter***

Claims 1-39 are allowed. The following is an examiner's statement of reasons for allowance:

There is not taught or disclosed in the prior art a whispering gallery mode resonator as in claim 1 formed of a dielectric spheroid and shaped with an eccentricity such that free spectral ranges of modes circulating along an ellipsoid cross section and the equator cross section are compatible in magnitude. Typically in the prior art resonators without such an eccentricity, the free spectral ranges of such modes will be at least an order of magnitude apart, and thus not compatible in magnitude. The remaining claims include whispering gallery mode resonators having these features and are allowable for the same reason.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
